

FOR IMMEDIATE RELEASE

Union Gas Selects TeleStaff for Automated Scheduling and Communications and Begins Implementation Process

Irvine, CA. – December 8, 2009 – PDSI (Principal Decision Systems International) is pleased to announce that Union Gas, a public utility company based in Ontario, Canada, has selected TeleStaff Crew Scheduler and Crew Messenger for automated scheduling and notification. Union Gas is a major Canadian natural gas storage, transmission and distribution company, and its distribution business serves 1.3 million residential, commercial and industrial customers in more than 400 communities across northern, southwestern, and eastern Ontario, Canada.

The Union Gas project team began the implementation, configuration, and training process with PDSI, the TeleStaff vendor. The solution will be rolled out and utilized by the company's Planning and Dispatch Group initially.

"We are pleased that Union Gas has chosen PDSI as its partner for automated scheduling and communications technology and support services, and we're looking forward to building a long-lasting partnership with the company," stated Greg Ekstrom, PDSI president.

About TeleStaff Utility Solutions

TeleStaff Crew Scheduler and Crew Messenger are 100% commercial-off-the-shelf solutions designed to automate crew callout, emergency communications, and messaging for utility organizations. Through patented scheduling technology capable of incorporating business rules, policies and procedures, built-in communication features, and self-service employee access, TeleStaff Crew Scheduler and Crew Messenger make scheduling and managing planned and unplanned outages more efficient while ensuring compliance with collective bargaining agreements, labor laws, and other policies.
